

## dott. Pier Francesco Rambaldi

### Curriculum Vitae

Born in Naples, 7-2-1965. M.D. degree (1989, summa cum laude) with an experimental thesis on Tc-99m DTPA scan in diabetic nephropathy. Specialist in Nuclear Medicine (1993, summa cum laude) with an experimental thesis on In-111 Octreotide scintigraphy in Graves' ophthalmopathy. Specialist in Radiology (1998, summa cum laude) with an experimental thesis on receptor imaging in pituitary adenomas.

He's working in Nuclear Medicine of the University of Campania "L. Vanvitelli" (1990 to now), as Medical Doctor and since 2017 as Associate Professor in Diagnostic Imaging.

He has been between pioneers in the use of In-111 Octreotide and Tc-99m Tetrofosmin SPET and PET-FDG in oncology (lung tumours, breast tumours) and in benign conditions (Graves ophthalmopathy, pituitary adenomas, parathyroid adenomas), obtaining original results. He also worked in the paediatric field with particular interest in nephrourology developing clinical and experimental model for the evaluation of hydronephrosis and renal damage. He has been also part of research projects in oncology, including the use of Tc-99m Tetrofosmin, Tc-99m sestamibi, In-111 Octreotide.

Author of 300 papers, abstracts and chapters of books at national and international level, has been speaker in national and international meetings and workshops.

At present is also Professor of Nuclear Medicine at School of speciality in orthopedics, Pneumology, Paediatric Neuropsychiatry, Paediatric Surgery, Gastroenterology, Ematology, Metabolism.

Component of a Center of Excellence in Cardiology at the Second University of Campania "Luigi Vanvitelli".
