

Prof. Vincenzo Cuccurullo, Md, Phd was born in Naples, Italy and received his M.D. degree from the Second University of Naples in 1994 and his experimental thesis was on ^{111}In -Octreotide scintigraphy in Graves' ophthalmopathy.

At the same university in 1998 he obtained his Specialist in Nuclear Medicine with an experimental thesis on Scintimammography. In 2002, he was awarded a Ph.D. in Diagnostic Imaging and a component of his research was carried out at the Center of Excellence in Cardiology, Second University of Naples.

Since 2003, Prof. Cuccurullo has been working as a Medical Doctor in Nuclear Medicine at the Second University of Naples and from 2008 as an Assistant Professor in Nuclear Medicine researching in Diagnostic Imaging techniques.

He has been part of several research projects especially in the field of oncology including the use of $^{99\text{m}}\text{Tc}$ -Tetrofosmin (Myoview) and $^{99\text{m}}\text{Tc}$ -Sestamibi in oncology. Other projects including the application of ^{111}In - Octreotide and radioguided surgery (RGS). Prof. Cuccurullo is the author of more of 200 articles consisting of research papers, abstracts and chapters of books. He has presented his research (oral presentations and scientific posters) at national and international level, has been an invited speaker at national and international meetings and workshops. He is a book reviewer for the European J. of Nuclear Medicine and Molecular Imaging and Associate Editor of Current Radiopharmaceuticals.

From 2017 he is Associate Professor in Diagnostic Imaging and Radiotherapy at University "L.Vanvitelli" in Naples.
