

Curriculum Vitae and Scientific

- **Name:** *Vincenzo Napolitano*
- **Sex:** *Male*
- **Date and Place of Birth:** *April 24, 1954 - Naples (Italy).*
- **Nationality:** *Italian*

- **Present Occupation:**
 - Associated Professor of General Surgery at the Università della Campania Luigi Vanvitelli
 - Chief of the Unit of Endoscopic Surgery

- **Education:**

- 1979 : Degree at School of Medicine University of Naples
- 1985 : Specialization in General Surgery
- 1990 Specialization in Digestive Surgery and Digestive Surgical Endoscopy

- **Teaching in the following Degree Courses:**

- Laurea Magistrale in Medicina e Chirurgia. Teaching: Gastrointestinal Surgery (4th year)
- Laurea Triennale in Infermieristica. Teaching: General Surgery (2nd year)
- Laurea Triennale in Informatore Medico Scientifico. Teaching: Surgical Physiopathology (3rd year)

- **Teaching in the following Schools of Speciality:**

- General Surgery (from 2015 until today)
- Digestive Diseases Surgery : “Endoscopic Techniques” (from 2000 to 2019).
- Gastroenterology and Digestive Endoscopy: Endoscopic Techniques” (2000-2001 and 2001-2002). “ Endoscopic Ultrasound” (2011 – 2012)
- Otorhinolaryngology: “Surgical pathology” (from 2006 to 2010).
- Digestive Diseases: “Surgery” (from 2018 until today).

- **Membership in Professional Associations:**

- Member of Italian Club of Endoscopic Ultrasonography (IEC) (Vice Chairman from 2006 to 2011)
- Member of Italian Society of Surgical Endoscopy (ISSE) (Chairman of the local Committee of Campania from 2003 to 2007)
- Member of European Group for Endoscopic Ultrasonography (EGEUS)
- Member of Società Italiana di Endoscopia Digestiva (SIED)
- Member of Società Italiana di Chirurgia (SIC)

Professional experience

During his career Prof. Napolitano has been particularly interested in gastrointestinal pathology, specially as regard to the esophagus, the stomach and the colon. The study group which he has worked with, dedicated most part of its activity to the pathophysiology of the esophagus. Most part of his surgical activity has been likewise dedicated to the treatment of gastrointestinal diseases and he achieved a good experience both with laparotomic and laparoscopic approach.

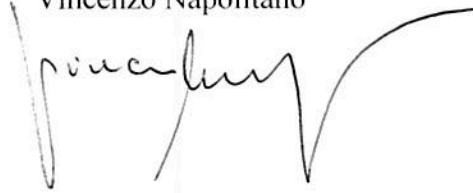

Even since the beginning of his career Prof. Napolitano has been also particularly interested in endoscopic techniques, both diagnostic and therapeutic that he has been practicing since the early eighties of the last century. Moreover, in 1992, he started the practice of Endoscopic Ultrasonography after he had attended the Department of Gastroenterology and Hepatology of the Academic Medisch Centrum in Amsterdam for a dedicated training. Up to now Prof. Napolitano has performed more than 10000 EUS procedures, 25% of which were associated with FNA or FNB. In the recent years, most of EUS procedures (about 70%) concerned the diagnosis and management of pancreatic neoplasms, both solid and cystic. Prof. Napolitano is a member of the board of the

multidisciplinary group for the study of the neuroendocrine tumors established in Naples in 2010. This group, that includes many specialists from five scientific institutions, has been acknowledged as an European Centre of Excellence by ENETS (European Society for the Study of Neuroendocrine Tumors). Prof. Napolitano is the author of more than 300 scientific papers, 60 of which available on Scopus, and of several chapters in scientific books.
